

Inserting text is as easy! Just click the “Text” button to the left of the screen. When you click on the body of text that you have written, you can change the font, color, alignment, location and size.

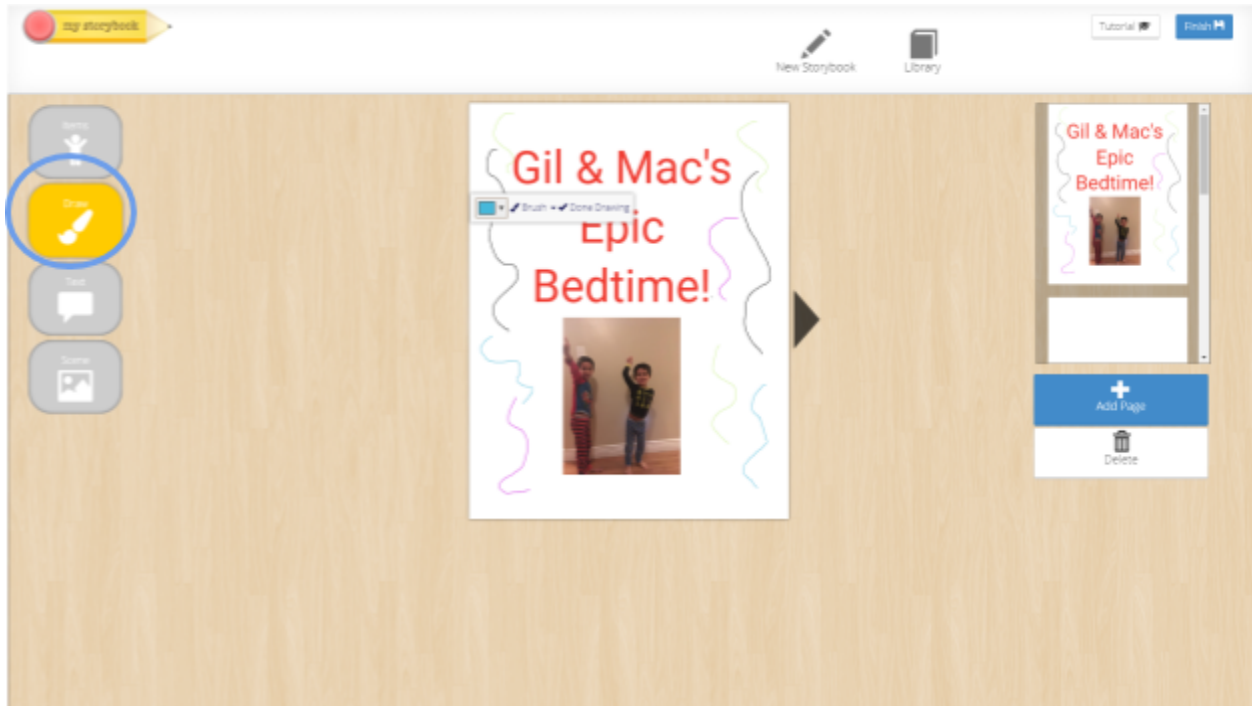

Before you go any further, you must save your story. As you add your first image, the site will prompt you to make an account so you can save your story.

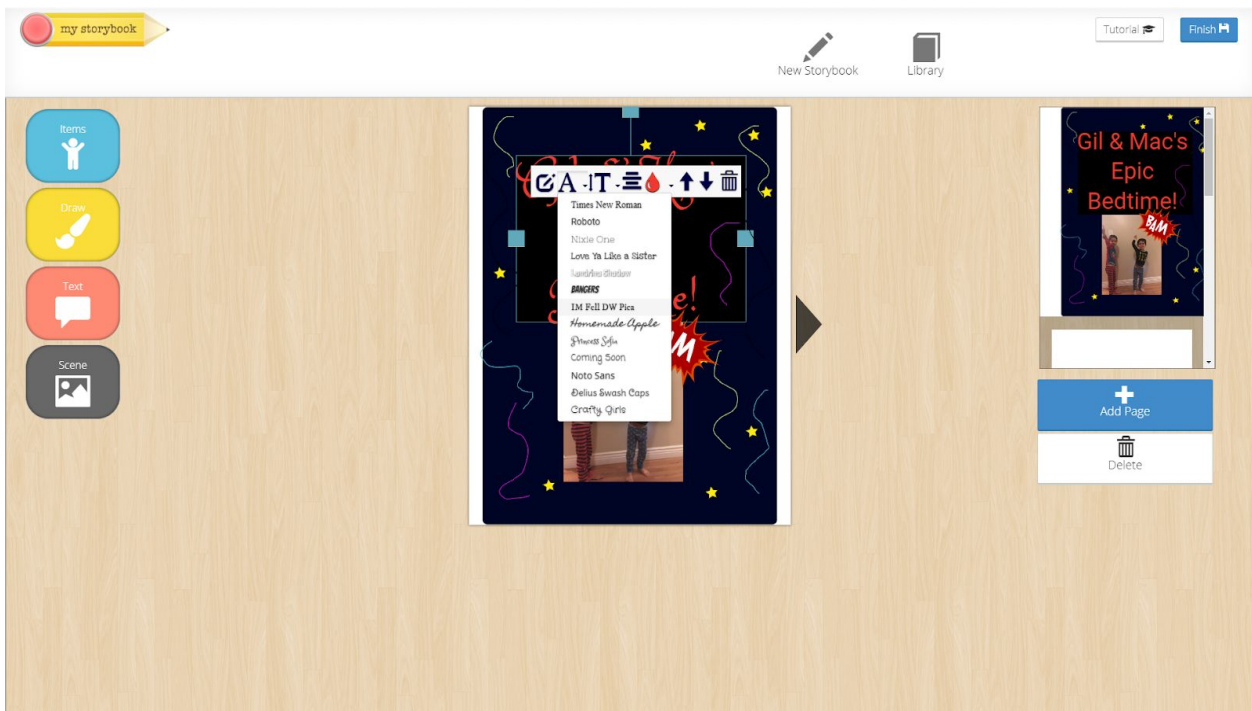

To add an image, click the "Items" button on the left side. You can choose from the stock images the site has available, or add your own image by clicking the "Add Your Image" button on the bottom.

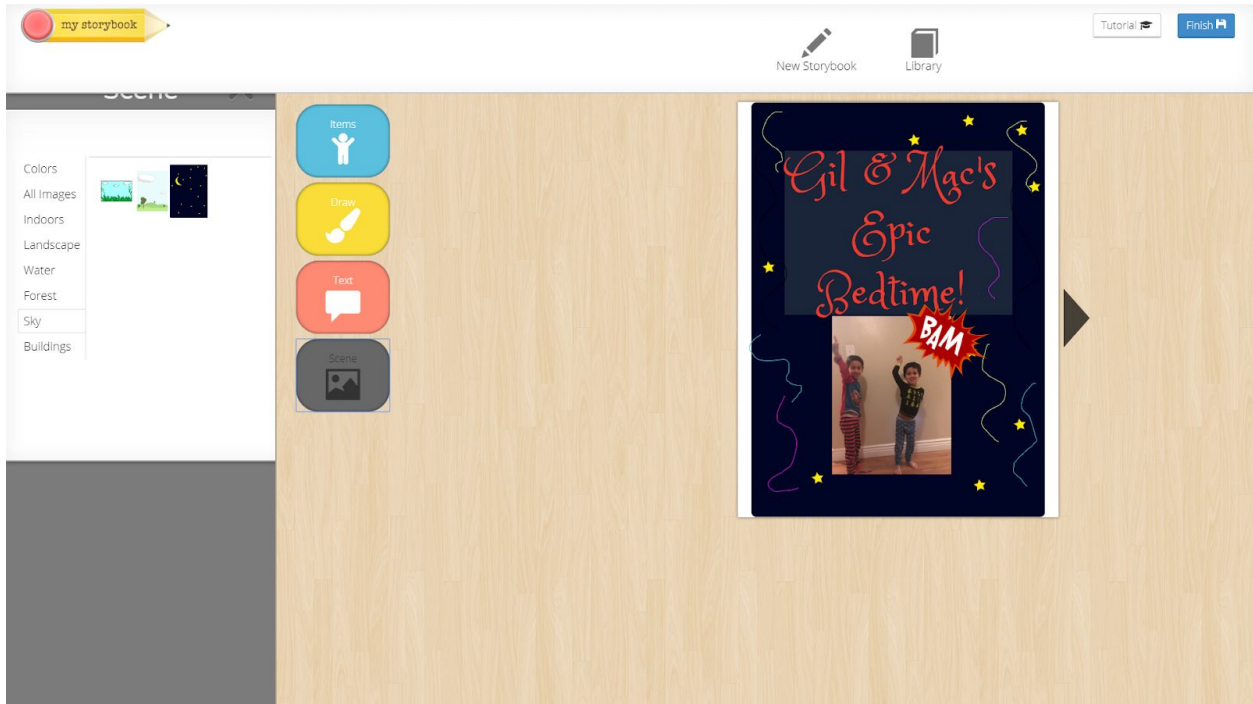

If you change your mind and dislike anything you've added, simply click it and then click the trash button.

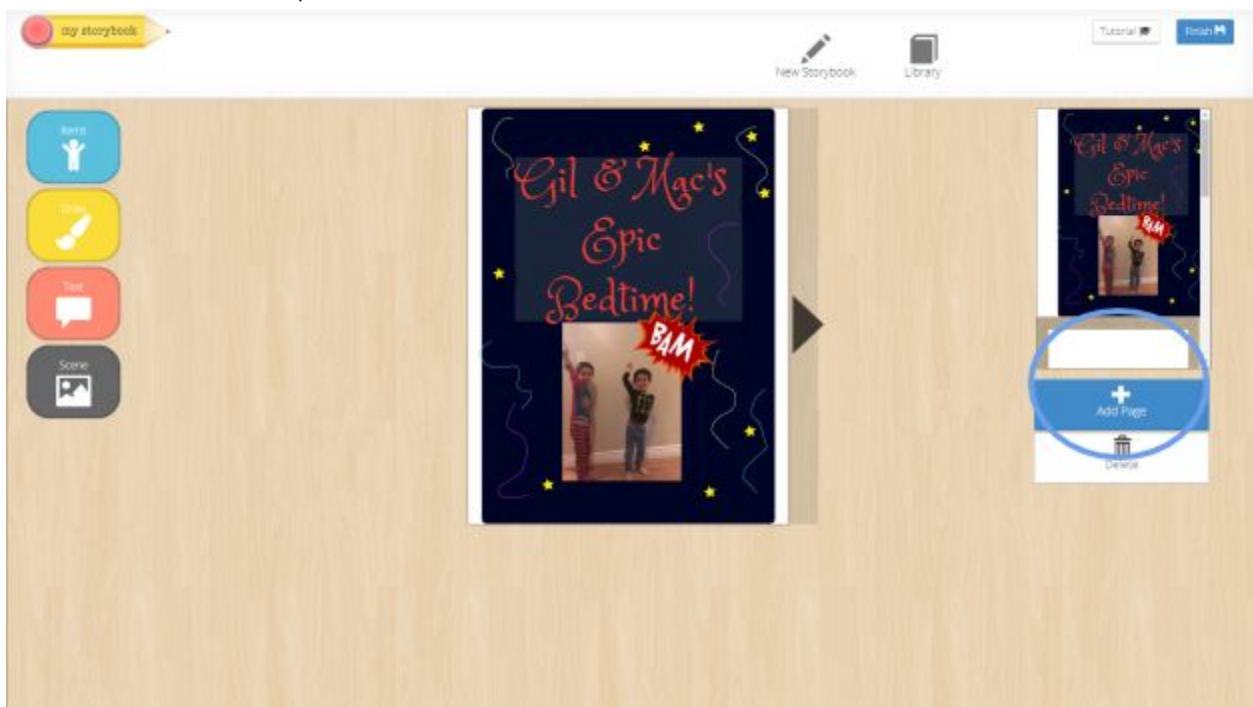

Add your personal touch by using your finger or mouse to draw out some designs on your page.

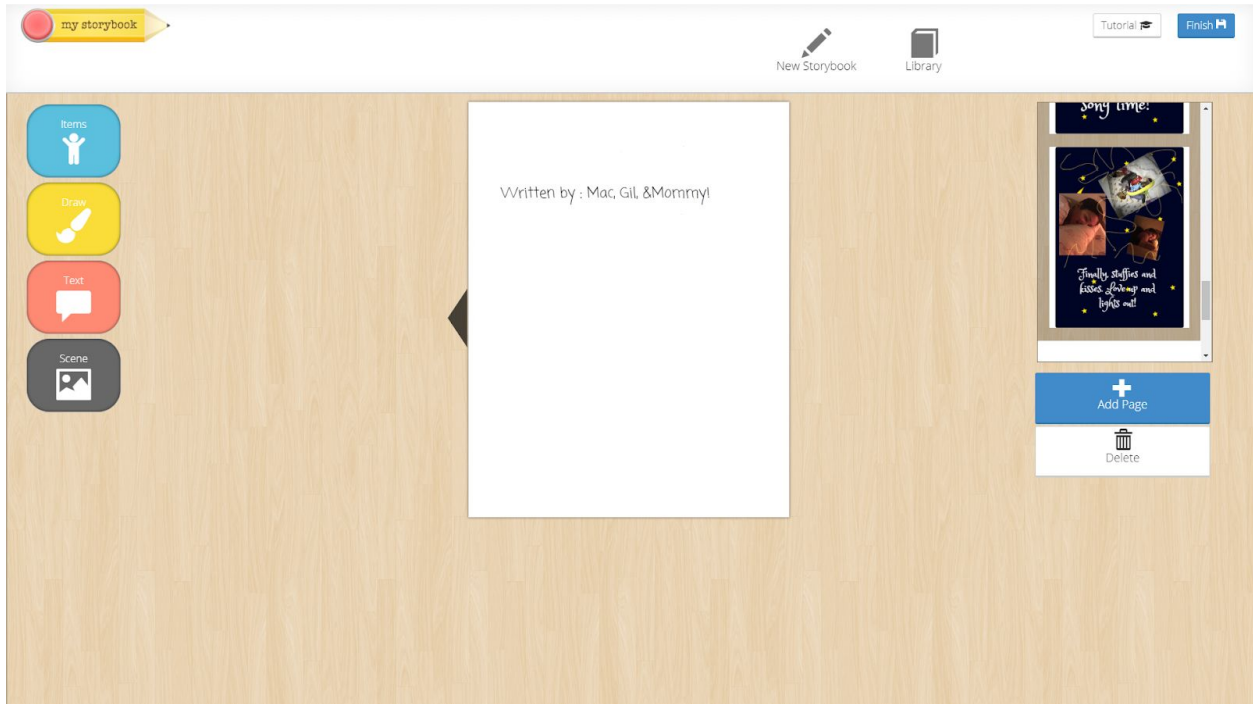

We personalized ours with drawings, stock images, and we changed the font!

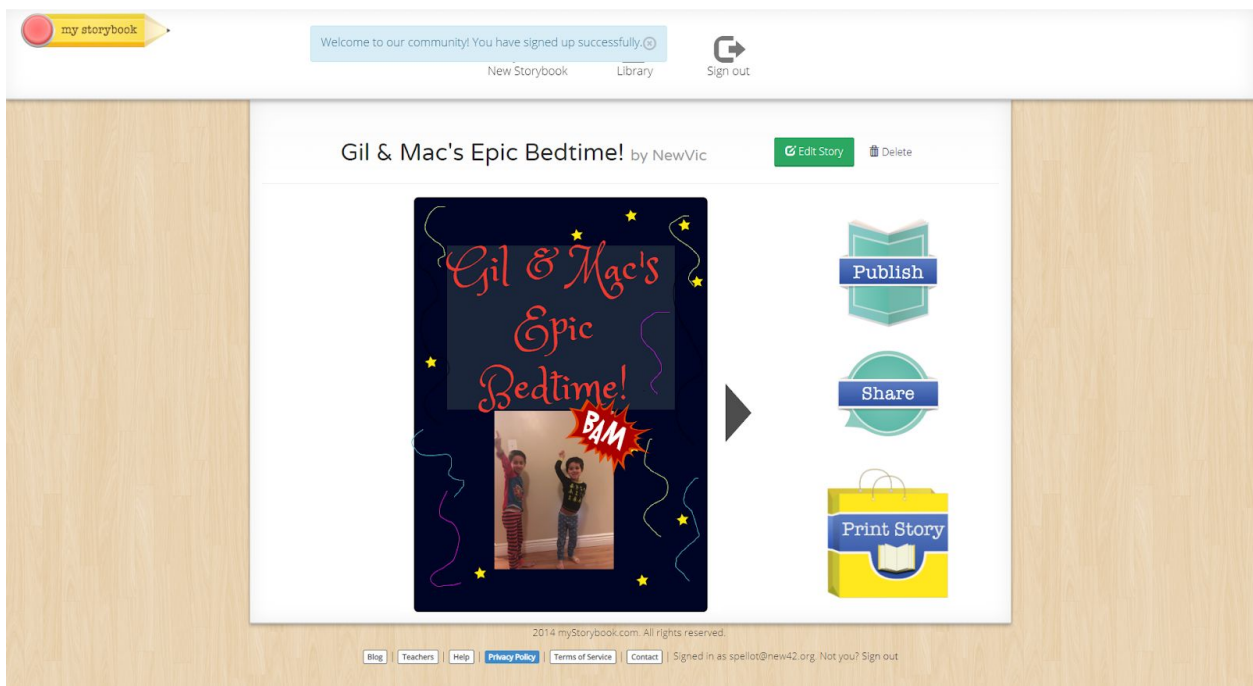

Tada! Front cover completed.

To create your next page simply click the Add Page button on your right hand side. Repeat all of these steps to create each individual page for your story.

When you are done with your story, the last page will ask you to write a little info about your story. You could do that, or you could also keep it to a simple Written By:_____ .

When your story is all done, you can publish and share through various social media outlets. The site also has an ebook download option for a fee of \$5.00.

Have fun making your story!
